**FIDELITY-COMTECH NOMINATED FOR SMALL BUSINESS PRIME  
CONTRACTOR OF THE YEAR AWARD**

LONGMONT, CO, MARCH 19, 2007: The United States Air Force Research Laboratory (AFRL) in Rome, New York, has nominated Fidelity-Comtech Inc. for the "Small Business Prime Contractor of the Year Award for 2007" because of its ongoing superior Prime Contractor Services.

The Small Business Prime Contractor of the Year Award honors small businesses that have provided the government and industry with outstanding goods and services as prime contractors or as subcontractors. Fidelity Comtech provides AFRL wireless IEEE 802.11b/g Phocus Array systems that enhance information assurance and increased privacy while extending "reach" for outdoor networks using patented dynamic antenna technology.

"We are thrilled to be recognized for delivering quality products and services by such an esteemed customer" said Joe Carey, President and CEO of Fidelity Comtech, Inc. "We are proud and delighted to work with them."

~ MORE ~

The U.S. Air Force Research Laboratory is the Air Force's only organization wholly dedicated to leading the discovery, development, and integration of warfighting technologies for our air and space forces. AFRL traces its roots back to the vision of early airpower leaders who understood science as the key to air supremacy. The passionate commitment of our people to realize this vision has helped create the world's best air and space force. For more information, visit [www.wpafb.af.mil/AFRL](http://www.wpafb.af.mil/AFRL) or call 1-937-904-9851.

Since 2001, Fidelity Comtech has provided premier RF components, antennas and interfaces to commercial and government customers. Its Phocus Array™ products using Vector Modular Technology™ (FlexVMT™) with G.R.I.P.S.™ (Geo-location, Reach enhancement, Interference mitigation, and increased Privacy/Security) features are changing and improving the way the world uses wireless communications. Fidelity Comtech is the leader in extended wireless and Geo-Location products. Its products deliver the flexibility of traditional Wi-Fi IEEE 802.11 wireless products with the capability to dynamically “beam steer and shape” extended signal for miles while deriving directional and distance information about the client. Phocus Array, FlexVMT, G.R.I.P.S. and Vector Modular Technology are trademarks of Fidelity Comtech Inc. All other trademarks are the property of their respective owners. VMT is an acronym for the technology covered by U.S. patent #6,894,657. For more information, visit [www.fidelity-comtech.com](http://www.fidelity-comtech.com) or call 1-303-678-8876.
